#### What the Pros Know

When stripping a floor, it is recommended to flood the floor using 1 gallon of diluted stripper for 100 square feet of flooring.

#### Description

The most effective floor finish emulsifier ever developed. Will solubilize aged and built-up finishes almost instantly. May be used as a no-scrub stripper or with a conventional floor machine and pad depending on the concentration of the product and the condition of the floor.

#### Directions

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.

1. Sweep or dust mop the floor to remove any debris.
2. Dilute Low Odor Floor Finish Remover from 1:2 to 1:11 (43oz. to 11oz./gal) with cold or warm water, depending on age and build-up of finish. Do not use hot water.
3. Apply liberally with a mop to an area small enough so as not to allow the product to dry. Be sure to completely cover floor to baseboards.
4. After 3 to 5 minutes, agitate the wet section with a mop or machine scrub. Pick up solution using a mop, wet vac or automatic scrubber.
5. Rinse thoroughly with clear water to remove residue as necessary.
