# Meet the Bona® Facility Solutions Team

As the leading distributor group in the Jan-San industry, we've partnered with Bona® US to provide you with the best products and services to deliver you great looking floors.

Scan the QR code, or go to Triple-S.com to learn more!

# Trust the Experts

For nearly 100 years, Bona has been the industry leader in innovative and premium product solutions for hardwood floors. We pride ourselves on our passion for hardwood floors, our heritage, knowledge of the industry and training expertise. As the industry changes and grows, Bona continues to focus on sustainability and our environment, while researching and producing quality products, systems and services that will benefit our customers and hardwood floors. We remain the only company in the industry to offer a complete product line, specifically designed for athletic wood floor systems, including daily maintenance, recoats and full sand & finish.

# Why Choose Bona:

- Dedicated resources, both in facilities and expert personnel, to the research and development of products specifically for athletic wood floors.
- Committed to leading the industry in green solutions, developing and promoting products that meet or exceed governmental standards for the environment.
- Approved MFMA and FIBA products.
- Products protect a majority of NBA and collegiate floors and have been used on the Final Four floors.
- Manufacture proprietary polymers.
- Pioneered the development and use of waterborne finishes and dust-free sanding and continues to formulate safer products and systems.

# We work hard to create products and systems that work together to provide exceptional results for hardwood floors around the world.

# Bona's Products are Green Seal<sup>®</sup> and GREENGUARD Certified

In 2017, Bona received Green Seal certification on both of our SuperCourt® cleaner concentrates for athletic wood floors. These products meet Green Seal Standard GS-37 based on effective performance, concentrated volume, minimized/recycled packaging, and protective limits on VOCs and human and environmental toxicity. Green Seal provides science-based environmental certification standards that are credible, transparent and essential to helping manufacturers, purchasers and consumers make responsible choices that positively impact business behavior and improve quality of life. (GreenSeal.org)

Bona's industry-leading waterborne finishes have always been VOC-compliant and healthier for people and the environment than most other finishes. Along with unsurpassed durability and beauty, our finishes are GREENGUARD Certified for indoor air quality along with Bona cleaners that are also GREENGUARD Gold Certified. (Greenguard.org)

ZAC HAIFLICH

JOHN MCGRAN

ASHTON SALLINGER

Dave is the Facility Solutions National Sales & Market Manager. For over 25 years, Dave has worked in the hardwood industry. He started as a contractor in California and gained first-hand experience on all job types for 15 years, then moved to distribution and has now spent more than 10 years at Bona.

A note from Dave: I truly enjoy working in the Facility Solutions channel, training and working with various people to give them the best in hardwood and resilient floors. I have been dedicated to being an expert in this craft and look forward to passing on my experience to others.

Zac is the Facility Solutions Sr. Territory Manager - West. His region covers AZ, CA, UT, NM, NV, OR, ID, TX and WA. He has more than 10 years of Facility Solutions sales experience working in the education/government sector, and brings over 20 years of experience working with distributors, dealers and big box retail.

A note from Zac: Please feel free to give me a call if you would like to set up a demo, training class or have any troubleshooting questions. I look forward to hearing from you!

Jeff is the Facility Solutions Regional Territory Manager - Midwest and has been in the Facility Solutions industry for 30 years. Over this time, he's called on end-users, national accounts and managed a sales staff.

A note from Jeff: Let me put my experience to work helping you grow your gym floor and commercial cleaning business profitably.

John is the Facility Solutions Regional Territory Manager - Northeast. John has over 25 years of K-12 sales experience partnering with all types of school decision makers at the district and school level. His goal is to be a trusted partner with schools and provide exceptional customer service and product knowledge while helping educators make informed buying decisions.

A note from John: Feel free to contact me for gym and resilient floor demos and/or questions about how Bona can provide you with the best flooring system for your schools

Ashton is the Facility Solutions Regional Territory Manager - Southeast. His region covers NC, SC, GA, AL, FL, MS, LA, and AR. He holds a Bachelor of Science degree in Integrated Science and Business and brings 3 years of experience as a floor care subject matter expert. Ashton is proficient in many aspects of facility cleanliness and maintenance.

A note from Ashton: I am proud to be a member of the Bona team. Let's set up a training and demonstration. I look forward to hearing from you.

# Athletic Wood Floor Finish Reference

BETTER GOOD

Bona's industry-leading waterborne finishes are **GREENGUARD Gold** Certified for indoor air quality.

# **TIPS** for Bona SuperCourt<sup>®</sup> Finish Application

# **APPLICATION:**

- READ THE LABEL INSTRUCTIONS COMPLETELY BEFORE APPLYING FINISH. - Labels provide proper product system sequences, application rates, recommended tools, dry times and compatible products.
- Use a Bona lightweight t-bar for waterborne applications.
- Use a heavyweight t-bar for oil-modified applications.
- Walking speed and applicator pressure will most affect your application rate.
  - Walking slow with added pressure applies finish thinner.
  - Walking faster with just finger-tip pressure applies finish heavier.

# **AIR FLOW:**

- During finish application, limit or eliminate air flow.
- Once the first coat of finish has flowed, leveled and tacked off on the surface, move air aggressively across and out of the room.
  - This can be done by setting up fans from doorways blowing into the room (not directly at floor level) and at opposite doorways pulling air out of the room.
- The faster you can remove solvent and/or water vapors from the air, the faster the finish will dry and cure.

# **TEMPERATURE:**

- Job sites need to maintain a consistent temperature during the coating process. • It must be 50°F degrees or higher at all times.
- Ideal temperature and humidity conditions for paint/finish application are 65°-80°F and 40-60% relative humidity.
- Paint and finish products should be acclimated to these optimal conditions before application. Higher humidity levels will increase dry times.
- It is recommended that the A/C is turned off during application. Exhaust fans can be used once the coat has flowed, leveled and tacked off.

# FOR BEST RESULTS:

- Wet Cleaning Pad.
- Using waterless cleaners or mineral spirits is extremely risky and should never be used for tacking.
- The floor must be 100% dry and clear of any liquid or debris prior to product application.
- Make sure the last coat is dry before applying additional coats.
- Bona waterborne finishes do NOT need to be abraded for adhesion if the next coat is applied within 48 hours. If 48 hours has passed since the last coat, abrade the floor with a Bona Conditioning Pad (320-grit) or Bona Diamond abrasives (180 or 240-grit).
- Applying oil-modified products without abrasion between coats is not recommended. These products must be freshly abraded between all coats.

# IF YOU HAVE QUESTIONS OR CONCERNS CALL YOUR TRIPLE S OR BONA SALES REPRESENTATIVE BEFORE YOU START.

Bona

• After abrasion and before finishing, dry tack with the Bona SuperCourt<sup>®</sup> Athletic Floor Care Mop and Bona Microfiber Dry Dusting Pad or wet tack with the Bona Microfiber

# Bona SuperCourt **Athletic Floor Care Maintenance**

# **PERIODIC MAINTENANCE:** (Recommended three times per week, and daily during high traffic/gym use times)

# **SCUFF REMOVAL:**

# **AUTO SCRUBBING:** (Should not be performed on new athletic wood floors)

# **PREVENTION:**

• Place proper walk-off mats in doorways to keep out dirt and grit.

• Install felt pads on tables and chairs used on hardwood floors.

 Avoid excess moisture from tracked in water, leaks, or over-maintenance such as wet mopping.

# **DAILY DUSTING & CLEANING:**

• Dry dust daily with a Bona SuperCourt® Microfiber Dry Dusting Pad to remove dust, grit or other abrasive particles. DO NOT USE ANY DUST MOP TREATMENTS. Replace or wash dusting pads as necessary.

• Damp mop all spills or spots with a Bona SuperCourt Microfiber Wet Cleaning Pad dampened with Bona SuperCourt Hardwood Cleaner Concentrate. Dilute at the 1:128 ratio.

• Bona SuperCourt Winter Cleaner Concentrate can also be used to remove calcium chloride. Dilute at the 1:64 ratio.

• Dilute 1 part Bona SuperCourt Hardwood Cleaner Concentrate to 128 ounces of water for a cleaning solution. Tack with a Bona SuperCourt Microfiber Wet Cleaning Pad. Be sure to rinse or wash cleaning pad as necessary. Continued use of a soiled wet tacking pad will cause streaking.

• During winter months, use Bona SuperCourt Winter Cleaner Concentrate to remove salts and calcium chloride tracked in. Tack the floor with a Bona SuperCourt Microfiber Wet Cleaning Pad and be sure to wash after each use.

• Shoe marks and scuffs can be removed by using a tennis ball on a stick. Lightly mist diluted Bona SuperCourt Hardwood or Winter Cleaner Concentrate to the area (1:128/1:64), then apply moderate pressure with the tennis ball to safely and effectively remove the mark or scuff.

• If you choose to use an auto scrubber with Bona Bona SuperCourt® Microfiber Scrubbing Pads, dilute 1 part Bona SuperCourt® Athletic Floor Care Hardwood Cleaner Concentrate to 128 ounces of water and ensure machine is properly adjusted to remove all cleaner from the floor. No moisture should remain on the floor. Wipe up any remaining moisture with a Bona SuperCourt® Microfiber Wet Cleaning Pad. EXCESS MOISTURE CAN DAMAGE THE WOOD.
