Dilution Control System

Why It's A Better System

- Concentrate and RTU labels are numbered and color coded for safety and to facilitate training
- Closed system - Spill proof container
- New Metered Tip with each concentrate provides proper dilution each time
- English/Spanish label copy
- Each concentrate has an easy carry handle
- Recyclable container

Why It's A Better Cleaner

- Highly concentrated - provides low end use cost.
- Foaming formula - increases contact time to vertical surfaces
- Glycolic acid base - A readily biodegradable organic acid that will not be an issue of environmental waste. It is used to remove mineral deposits and soap scum.
- Refreshing clean fragrance - leaves surfaces smelling fresh

How It Cleans

FOR USE IN A SPRAY BOTTLE: Dispense diluted product into properly labeled RTU container. Simply spray on surfaces to be cleaned, let solution sit and wipe off with a clean absorbent cloth or towel. For heavy soils, allow surface to soak 3 - 4 minutes, then agitate, and rinse clean.

FOR USE IN AN AUTOMATIC SCRUBBER OR MOP BUCKET: Dispense diluted product into mop bucket or automatic scrubber. Apply product on surfaces to be cleaned. Allow a few minutes of dwell time for the solution to penetrate the soil. If necessary, agitate to help remove excessive soils. If solution becomes visibly dirty, discard and make up fresh solution. Rinse with clean water as needed.
