

Navigator 4 - Dilution Control System

Overview

The Navigator 4 is a four product chemical dilution control system. This unique dispenser combines state of the art dispensing technology that provides remote operated bucket fill and one hand fill actuation for optimum ease of use. The reduced size “footprint” of the Navigator 4 allows for greater placement flexibility.

Here are some unique features/specifications designed into the system:

- Secure Link Closed Loop caps and inserts for added safety
- Dimensions H = 23.05”, W = 16”, D 8.7”
- Weight – 16 lbs.
- ASSE 1055 approved Action Gap back flow preventer
- Flow Rate – 2.5 Gallons per Minute
- Cabinet Material – High Impact, Polypropylene
- Caps and inserts are keyed to prevent misuse of the system
- Tamper proof “in bottle” metering tips provide optimum dilution accuracy
- Locking cabinet prevents tampering and provides added user safety
- Simplicity, 1 selector knob provides 4 choices of chemical for both bottle and bucket fill
- Ease of use - One hand bottle and remote bucket fill
- Has proven pilot valves technology to activate the bucket and bottle fill. (No cable used that could cause maintenance issues).
