

## BRIGHT FORCE

# RINSE AID

Designed to prevent water spotting and streaking on glassware and flatware during the dishwashing process. This formula is built using superior detergents to produce the most effective sheeting to prevent hard water mineral deposits. The low foaming attribute specifically allows for the most effective and efficient rinse process.

## Directions

Each facility will require a varied dilution requirement to achieve appropriate drying and sheeting. Traditional usage is between 3-6 ml per rack. Test multiple racks to ensure effective dilutions are met for your facility.

## Features

- Versatile for Use in Range of Equipment
- Quickly and Easily Improves Sheeting
- Prevents Hard Water Spots
- Low-Foaming Formula

## Recommended For

- Hot Water Dish Machine
- Cold Water Dish Machine

## Specs

**Dilution:** Varies

**pH Level:** 4.0-6.0

**Color:** Red

**Fragrance:** Fragrance-Free

**Pack:** 5 Gallon Pail (#25102)

**Concentrated formula allows for customized dilution for your facility's needs.**
