

BRIGHT FORCE

HD Delimer

This highly concentrated, phosphoric based descaler is especially effective against lime, calcium, hard water and other scale on metal and plastic surfaces. Perfect for use in both high and low temp dish machines to help keep the tubing, jets and rinse arms clear of build-up producing a more effective clean.

Directions

Dish Wash Machines:

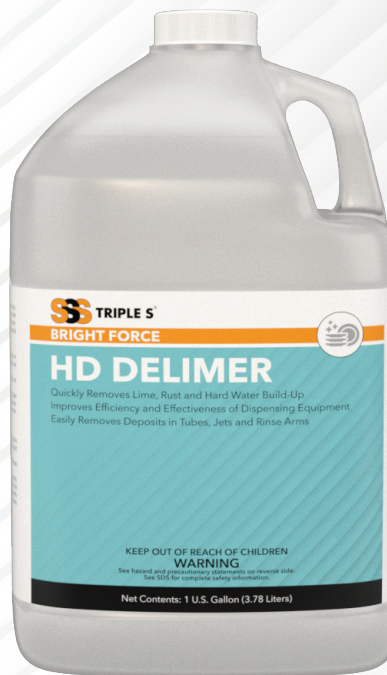

- Dilute 8 oz. per wash tank.
- Run machine for 10 minutes on the Delime setting.
- For best results, close drain and use hot water.
- Rinse thoroughly and resume normal use.

Drinking Fountains:

- Dilute 1 oz. per gallon of water to remove hard water film and iron stains.
- Thoroughly rinse with water.

Aluminum/Metal Brightening:

- Dilute 1 or 2 oz. per quart of hot water.
- Remove any loose soils starting from bottom with a brush.
- Agitate surface where necessary & rinse thoroughly.
- Always apply to small area first to determine proper concentration.

Features

- Versatile for Use in Range of Equipment
